Program Name	Technical Analysis Advanced Swing Trading
Start Date	10/06/2019
End Date	13/06/2019
Time	Full Days
Fees	USD 1350 per participant
Registration Deadline	16/5/2019
Language	اللغة الاساسية هي اللغة الانجليزية
State	Palestine
Location	Ramallah
Targeted Audience	Active and brilliant traders with good experience in trading to become in the future Certified Financial Technicians
Introduction	The best thing to do in the uptrend is to buy and the best thing to do in the downtrend is to sell. But Where and When is what differentiates a great trader from a regular trader. In this course you will learn how to trade the trend reversals while using the counter trend corrections to your advantage. You will be able to optimize your reward as compared to your potential risk through harvesting much larger targets while risking a very tight stop loss. In addition to the advanced price action analysis you will learn the most important thing in trading which is money and risk management. You will be able to put the most important indicators at work to objectively evaluate each trading signal and manage your exposure before clicking the button.
Bonus	Special Bonus for participants by the Trainer

<p>Outcomes</p>	<p>By the end of the course, the participants will be able to:</p> <ul style="list-style-type: none"> • Differentiate between a healthy correction and a trend reversal • Recognize trends in their early beginnings and endings • Identify the best entry and exit levels • Discover the correct levels to set your stop loss and how to trail it • Take advantage of counter trend corrections • Distinguish important Japanese candlestick patterns • Control your account exposure through money and risk management
<p>Topics</p>	<p><u>ONE</u></p> <p>Will start by going over the anatomy of a trading system and the three crucial M's, method, money and mind. Traders will be provided with a working knowledge of charts for market forecasting – pure price analysis. They will be then trained on how to correctly identify market tops and bottoms. After covering all the elements of price action, we'll move onto the basic concept of charts – identifying market trends. Traders will get a firm grounding on when reversals happen, and why, by examining Tops & Bottoms using the efficient Avramis Swing Indicator.</p> <p>Price Action Analysis</p> <ul style="list-style-type: none"> ▪▪ Trading System Elements ▪▪ Bottoming Patterns ▪▪ Topping Patterns ▪▪ Identifying Tops & Bottoms ▪▪ Failure Swing Formation ▪▪ Market Trends ▪▪ Identifying Trends ▪▪ Non Failure Swing ▪▪ Real Time Examples

TWO

Traders will learn how to enter the market using 2 of our entry strategies – the trend reversal entry and the breakout entry. Traders will learn how to identify different market setups and manage the optimum entry level for different trending phases. After Identifying the right setups and entry levels we will go over our unique method of filtering the breakout entry strategy in order to distinguish between a correct breakout entry and bull and bear traps. Participants will be equipped with the knowledge on how to set the flawless stop loss level.

Entry Signals & Indicators

- Trade Setups
- Filtering Breakouts
- Entry Levels
- Trend Reversal Entry
- Bull Traps
- Stop Loss Levels
- Breakout Entry
- Bear Traps
- Real Time Examples

THREE

Building on what was covered on topics One and Two, traders will learn, step-by-step, how to effectively use the Fibonacci retracement and projection levels to set various targets for each entry strategy. Managing the trade's exits will be discussed in details including how to correctly trail stop losses in order to minimize the portfolio exposure. On this day we will focus on the live analysis using our proprietary Avramis tools with profitable trading being our target. This day we will trade, trade and then we'll trade some more!

Exit Strategies

- The Fibonacci Magic
- Take Profit Targets
- Putting it All Together
- Retracement Levels
- Trailing Stops
- Real Time Examples
- Extension Levels
- Exit Strategies
- Live Trading

FOUR

Mastering swing trading means the understanding of the relationship between time frames. Participants will gain a concrete understanding of advanced Japanese candlestick analysis to create their own strategy by combining the trends and waves of the market. They'll identify when to get into the market, to buy or sell, using our favorite entry method - the wave entry, for the best risk/reward ratio. We will introduce trend and momentum indicators and how to use them properly in trading, for proper trade evaluation. This knowledge will also help traders identify trade strength and develop the all-important risk management strategy and placements of stop loss and take profit levels to ensure they are in control of their trading – not the other way around!

The Wave Entry

- Multi-Timeframe Trading
- Wave Entry
- Early Exits
- Candlestick Patterns
- Optimized Entry Levels
- Trade Evaluation
- Market Corrections
- Extended Targets
- Real Time Examples

FIVE

On this last topic we bring together all the technical analysis tools learnt and apply them under live market conditions. Participants will analyse and trade both international and local markets in real time under the supervision of their mentor. Risk and money management will be discussed intensively during this day and will be put to practice to help traders coop with different signal probabilities. This session's intensive trading will surely see participants make some mistakes; it will be an excellent opportunity to learn and profit from them in the future.

Managing Risks

- Identifying Risks
- Amount to Trade
- Limiting Drawdown
- Trade Expectancy
- Risk Management
- Conclusion
- Risk Reward Ratio
- High vs Low Probabilities
- Live Trading

Trainer

Mr. Avramis Despotis

An enthusiastic educator, authoritative voice in price action trading and inspiring personal coach, Avramis Despotis has been immersed in the financial markets for over two decades. Founder and CEO of Tradepedia, he is an expert instructor in technical analysis, risk management and behavioural finance and has mentored over 20,000 private and institutional traders. His technical analysis reports and signals are sought after by clients and stock brokers across Europe, Asia and the Middle East.
Over 20,000 Private and Institutional Traders Educated
Over 20 years of Experience

Avramis is regularly called upon by top-tier global firms like Interarab Cambist Association (ICA), National Commercial Bank, Arab Bank, Emirates NBD, Abu Dhabi National Bank, MENACORP and more to provide expert-level training to their top traders, fund managers and risk assessors.

As a specialist in stocks and derivatives, he correctly predicted the drop of the Western stock markets in 2007 and their subsequent rise in 2009 and the MENA region's drop in 2008 and rise in 2013. A long-time trader in his native Greek stock exchange, he publicly predicted the drop of the stock market from 2500 to 500 points in 2010 and the subsequent rise to 1300 points in 2013 and its fall to 750 in 2014.

Avramis is a Certified Financial Technician from the International Federation of Technical Analysts, a member of the British Society of Technical Analysts, is certified by CySEC for Portfolio Management and Own Account Trading and holds an MSc. in Finance. With a decade of interbank experience, in 2009 he founded Tradepedia, one of the leading training institutes and providers of automated software, market reports and signals.
